

Cookies on your device

This week we are going to look at Cookies on your devices. Cookies are usually delectable delights, but Web cookies can sometimes be less than delightful. These little files hide in your computer so that your browser and websites can track your browsing sessions and save certain useful information, such as account names and passwords, for later retrieval.

	<p>Each week we provide the step by step instructions on how to complete set tasks. This week we are continuing with the theme of making your own notes whilst doing the task.</p>		
	<p>You are all using different devices and different browsers, so the Cookies are stored in different places.</p>		
	<p>We want you to have control over how you learn new processes.</p>		
	<p>So, with the help and support of Ryan, Julie and our wonderful volunteers you are going to learn about the cookies on your device and make notes on how to look at them & delete if you want to.</p> <p>We have left some blank boxes for you to write the steps in. Draw an illustration if it helps for you to complete the step.</p>		
<p>Q</p>	<p>What device do you use?</p>	<p>A</p>	
<p>Q</p>	<p>What browser do you use to search the internet?</p>	<p>A</p>	
<p>Q</p>	<p>Do you know what Cookies are and what their use is?</p>	<p>A</p>	

Q	How often should you clear your cookies?		
	Open your web Browser and search for: What are cookies? Not the chocolate chip variety		
	Whilst still on your browser Search for: how do I remove cookies when using (type your browser name) browser.		
How to locate where cookies are stored			
1.	Open your internet browser		
2.
